Michele Zorzi, Universita di Padova

Mobiquitous 2007 will have a poster session to showcase "work-in-progress." Areas addressed by the conference include applications, service-oriented computing, middleware, networking, agents, data management and services, all with special focus on mobility and ubiquitous computing. The poster session will provide an opportunity for researchers in these areas to obtain feedback from knowledgeable conference attendees. Posters will be reviewed by members of the Poster Review Committee, and those accepted must be presented in the conference. Posters should not be abbreviations of published papers.

Where to submit: Please email your poster abstract to Dr. Al Harris (harris@dei.unipd.it), using the following subject line for the email: "Mobiquitous poster submission."

Important Dates

Paper submission: **May 10, 2007, 17:00 EST (Hard deadline)**

Notification of acceptance: **May 20, 2007**

Final version of abstract and posters: **June 4, 2007**

What to submit: You need to submit a **three-page** abstract describing the work. The abstract title should begin with the keyword "Poster:". The abstract should identify the key contribution of the work being presented in the poster. In addition, it should describe the particular problem being addressed, what makes this problem interesting or important, and what your approach is to the problem. Preference will be given to new and exciting problems as opposed to thorough but incremental pieces of work. Please use the ACM conference proceedings style (2-column) for preparing your abstract. For each author, please include institutional affiliation and status (student, faculty, and so on). In the final version of the abstract, you should also include a URL that will provide additional information about your work to the attendees.

Your abstract should not exceed the three-page limit; non-conforming submissions will not be considered for review. Please note that the abstract should be in PDF format. Word documents will not be reviewed.

At the conference, we will print and distribute the abstracts to all conference attendees in addition to the conference proceedings.

Poster Presentation: We define a poster to be an area ranging from 3x2 feet to 3x4 feet on which you present your research. This could be a single page, or could be divided into about 9 to 18 pages, each 8.5x11 inches (letter size). You can arrange the space and orient the poster either horizontally or vertically. You should prepare the best material (visually appealing and succinct) that effectively communicates your research problem, techniques, results, and what is novel and important about your work.

We will provide equipment for mounting the posters, but you will have to print (and, if you wish to, laminate or mount on a foam board) the poster and bring it to the conference site. We will ask you for your specific needs as the conference date approaches.
